DETAILED ACTION

Election/Restrictions

1. Claims 14, 16, 21-23 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 7/3/07. The traversal is on the ground(s) that parent claim 12 is generic and encompasses the embodiments represented in claims 21-23. This is not found persuasive because parent claim 12 recites the second connection device includes at least one of a receiving hole and a lateral cutout configured to receive a respective male contact connected to the respective second electrical conductor. Claims 21-23 contradict claim 12 by reciting the second connection includes a respective male contact configured to be received by a respective female contact connected to the respective second electrical conductor.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 13 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The relationship between the “fixed contact” recited in parent claim

12 and the "respective contact carrier", the "respective connecting point", the "fixed contact" and the "connecting point for wiring" remains unclear.
